Learn about **sea snakes**. Millions of years ago some terrestrial snakes left the land and took to the seas. Life at sea required many modifications to these snake's senses and physiology. Hear about the changes sea snakes have made from their terrestrial ancestors to adapt to life in water.

Learn about the work **Sea Shepherd Australia** does as a non-profit conservation organisation whose mission is to end the destruction of habitat and slaughter of wildlife in the world's oceans in order to conserve and protect ecosystems and species. Also learn about the Marine Debris Campaign to combat the growing tide of marine debris in the world's oceans and waterways.

Timings —
